18TH EDITION - 4TH AMENDMENT AWARENESS COURSE

Subject Area	Construction & Construction Trades
Student Type	Adults
Study Mode	Part Time

What is the course about?

Designed for electricians already working to the 18th Edition Wiring Regulations (BS 7671), this one-day electrical course provides a comprehensive overview of the changes introduced by Amendment 4: 2026. Learn what has changed, understand the impact on installation practices, and ensure your knowledge remains current and compliant.

Why should I choose the course?

You should choose to enrol on this one day course for electricians if you want to:

- Stay compliant with the latest regulations by gaining a clear understanding of the changes introduced in Amendment 4: 2026 to the 18th Edition Wiring Regulations (BS 7671).
- Enhance your professional knowledge with focused training designed specifically for practising electricians and electrical professionals.
- Understand the practical impact of the new requirements and how they affect electrical installation, inspection and testing activities.
- Learn from experienced industry professionals who can explain the changes and answer questions relevant to your day-to-day work.
- Minimise time away from work with a concise one-day update that delivers the essential information you need.Demonstrate your commitment to Continuing Professional Development (CPD) and keeping your technical knowledge current.

Important information: This is a one-day update training course only. If you would like to receive a college certificate of attendance as evidence of participation, please make this known to our Admissions Team during your enrolment.

No City & Guilds qualification is awarded, and there is no formal assessment associated with this course. If you require a City & Guilds qualification and formal assessment, please contact our Learner Services Team to discuss the full certification options available and identify the most suitable course for your needs.

What will I learn?

During this one-day update session for electricians, you will cover:

- Key changes introduced by Amendment 4: 2026 and their practical implications for electrical installation work.
- How to effectively locate, navigate and interpret amended requirements within BS 7671: Requirements for Electrical Installations.
- Updates relating to the protection, selection and erection of equipment, as well as relevant changes to inspection, testing and certification requirements.
- Any amendments affecting special installations and locations, where applicable.

- How the updated regulations can be applied to typical workplace scenarios and everyday electrical installation activities.
- For those preparing to sit the qualification examination, you will receive guidance on navigating and referencing BS 7671 efficiently during the assessment.

Why should I choose to study the course at Warrington & Vale Royal College?

Choose to study your one-day electrical course at Warrington & Vale College to benefit from:

- Local, trusted training provider with a strong reputation for delivering high-quality technical and professional training to the electrical industry.
- Industry-experienced tutors who understand the practical challenges faced by today's electricians and electrical contractors.
- Focused, practical learning that concentrates on the key changes introduced by Amendment 4: 2026, helping you apply updates confidently in the workplace.
- Convenient one-day format, allowing you to update your knowledge with minimal disruption to work commitments.
- Interactive learning environment with opportunities to discuss real-life scenarios and ask questions relevant to your role.
- Support for Continuing Professional Development (CPD), helping you maintain current industry knowledge and demonstrate ongoing professional competence.
- Clear and accessible delivery, ensuring you leave with a solid understanding of the revised requirements and their impact on electrical installation work.

What are the entry requirements?

This course is intended for practising electricians and electrical professionals who need to update their knowledge in line with Amendment 4: 2026. You must already hold the BS 7671: 2022 Requirements for Electrical Installations (18th Edition) certification.
You should have access to, or be familiar with, the current edition of BS 7671 to gain maximum benefit from the training.

Please note: This course provides update training only and is not suitable for learners seeking to gain the 18th Edition qualification for the first time. If you do not already hold the BS 7671: 2022 18th Edition certification, please contact our Learner Services Team to discuss the most appropriate training pathway.

Are there any additional costs associated with the course?

You must purchase the following before the start of the course: BS 7671: Requirements for Electrical Installations (18th Edition, 2018 + Amendment 4: 2026), at an approximate cost of £120. This publication is not included in the course fee and must be purchased separately. It is essential that learners have the correct and latest Amendment 4 version, as all course content and examinations are based on this publication.

If you would like a certificate of attendance, there is a fee of £91. Please advise our team if you would like a certificate of attendance when you come to enrol.

If you are looking to resit your qualification, there is an additional fee of £51. Please advise our team if you are interested in a resit when you come to enrol.
